Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over McGuire(U.S.Pat.6,054,691) in view of Burns(U.S.Pat.3,519,023). McGuire discloses an electric heater that shows all the features of the claimed invention save the collars and the thermostat. Burns discloses a defrosting collar for pipes that shows using collars and a thermostat. It would have been obvious to one of ordinary skill to use a thermostat to control heat and the circular collar structures to transfer heat to a round pipe.

Allowable Subject Matter

Claims 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Brossard, Campbell, Motoyoshi, Wenzel, DuPont, Desloge, and Eisler are cited to show structure similar to the claimed invention.
